

## Installing eGo Windshield Sticker Tags

eGo Windshield Sticker Tags are designed to be attached by a semi-permanent adhesive to the interior surface of nonmetallic windshields 0.190 to 0.230 inches (4.82 to 5.84 mm) in thickness. For optimum performance, you must install the tag at least 2 inches (5 cm) from the metal in the windshield frame and 0.75 inch (1.9 cm) from the rearview mirror support post. Some vehicles have a tinted area across the top of the windshield. If the tint is conductive, it can interfere with reading the tag. If a windshield has this conductive tint, the tag must be installed at least 2 inches (5 cm) below this tinted area. Some vehicle windshields contain a metallic treatment that could prevent an interior windshield-mounted tag from being read. However, many of these metallized windshields have areas that are not metallized. On a vehicle without open areas in its metallized windshield, you might need to install an Encompass 2 Reader Model 2110- compatible license plate tag on the vehicle. See the section "Installing eGo License Plate Tags" on page 3-15 and the section "Installing ATA License Plate Tags" on page 3-20. Contact TransCore for more information. See the section "Technical Support" on page 9-6.

### Required Materials

You need the following supplies to install windshield sticker tags:

- Glass cleaner, mild detergent and water, or any cleaning solution appropriate for your windshield
- Clean, dry cloth
- eGo Windshield Sticker Tag

### Positioning eGo Windshield Sticker Tags

TransCore designed the eGo Windshield Sticker Tag to be installed on the upper center or upper corner portion of the windshield. Figures Figure 3-4, Figure 3-5, and Figure 3-6 illustrate possible upper center tag placement locations. If the upper portion of the windshield is tinted with an aftermarket conductive tint, use placement Option B as shown in Figure 3-5.

#### Mirror Post Attached Low On Windshield

Choose placement Option A shown in Figure 3-4 if the mirror post is attached low on the windshield.

Figure 3-4 eGo Windshield Sticker Tag Placement Option A

#### Mirror Post Attached High on Windshield

Choose placement Option B if the mirror post is attached high on the windshield as shown in Figure 3-5 or if the upper portion of the windshield is tinted with a conductive tint.

**Figure 3-5 eGo Windshield Sticker Tag Placement Option B  
Mirror Post Attached to Headliner**

Choose placement Option C if the mirror post is attached to the headliner as shown in Figure 3-6. If the upper portion of the windshield is tinted with an aftermarket conductive tint, place the tag two inches (5 cm) below the tinted area.

## **eGo Windshield Sticker Tag Installation Procedures**

### **Caution**

*Confirm that the outside temperature is above 50°F (10°C). The sticker tag may not adhere correctly if the temperature is below this temperature.*

### **To install the eGo Windshield Sticker Tag**

1. Determine the tag installation location for the vehicle using the placement guidelines in the section "Positioning eGo Windshield Sticker Tags" on page 3-6.
2. Thoroughly clean the interior surface of the windshield behind and around the rearview mirror where the tag will be located.
3. Dry the tag location area thoroughly using a clean, dry cloth.
4. Remove the paper backing from the tag to expose the adhesive.

### **Caution**

*Ensure that the tag is correctly located before touching it to the glass. Once the sticker tag is applied to the glass, it cannot be moved without damage to the tag.*

5. Holding the sticker tag by its edges, position the tag in the correct area of the windshield (determined in Step 1), making sure the tag is oriented horizontally and is at least two inches (5 cm) from the windshield frame and 0.75 inch (1.9 cm) from the mirror post.
6. Press the sticker tag firmly against the glass and gently rub over the entire tag surface. Ensure that no air bubbles remain between the sticker tag and the windshield.

## **Removing eGo Windshield Sticker Tags**

Removing eGo Windshield Sticker Tags requires the use of a razor blade or equivalent tool. The tag is inoperable once removed.

Peel from this side.
